

REDEFINING EXTRUSION!

Shaping ideas

About us

Precision is a Dubai based large scale manufacturing company catering to a discerning clientele across the Middle East. Established as a small engineering company in 1984, the company has grown from strength to strength, and today, it's one of the most sought after organizations in the Middle East for rigid plastic products, moulds for packaging, and a range of industrial aluminium extrusion dies.

Precision is jointly owned by three of the most trusted corporations in UAE - **Al Tayer**, **ARMS** and **DULSCO**. Backed by over 800 employees working across two state-of-the-art facilities, Precision caters to over two dozen of the UAE's leading brands, with innovative industrial solutions.

Precision Tool & Die Division - experts in Aluminium Extrusion

At Precision 'Tool & Die' Division, we can give a shape to just about any kind of aluminium profile. But what makes us experts is our ability to achieve 100% precision within rapid lead-time. So you can rest assured of receiving your products of stringent quality standards, on time.

Consulting and Designing

At Precision, we have the expertise to design and deliver. Our engineers and designers update themselves with the latest in technology and constantly reinvent the way Tools and Dies are made. Our team's ability to understand the essence of the technical perspectives enables us approach our designs with unfettered creativity.

Production

We use the state-of-the-art production technology in our manufacturing process. Our design solutions are networked with all our CNC machines, providing a seamless flow of information and repeatability. Our production equipment includes CNC milling machines, EDM machines, EDM wirecut and CNC lathe.

Our in-house heat treatment facility is instrumental in helping us supply perfect dies within short timelines.

Quality

At Precision, we abide by the ISO 9001:2008 quality assurance standards, which we look upon as the backbone of our operation. We have a quality management system to ensure that only high quality products are passed on to our customers. Precisely why, we make all our dies using top quality die steel imported from Sweden. What's more, we ensure that every stage of the process is carefully monitored - from design to programme, manufacture to final shipment.

Our Strengths

One stop shop

- Partners from concept inception to realisation.
- Bespoke design and engineering services.

Peace of mind

- Local production and uninterrupted delivery.
- Quality track record - products and services.

Service assured

- Responsive sales service.
- Flexible supply chain and delivery.

Loyal local partner

- Top level MNC and GCC network.
- Long term vision.

Brand recognition

- Over 30 years as the extrusion die specialist in the GCC.
- High quality engineering and tooling capabilities.

Other Products and Services

Rigid Plastics Manufacturing

Mould Manufacturing

Precision Engineering Works

After Sales Support

At Precision, we strongly believe that delivering high quality products alone can't offer complete satisfaction to customers. Precisely why we have employed a team of engineers who offer intelligent, creative support services whenever you need them.
